Who we are

Soar Power and Energy Solutions Limited (SPEL) is an indigenous company with focus on commercializing Natural gas through the supply and installation of Natural gas equipment and infrastructure. We are motivated to bridge the knowledge and skill gap in the gas-power space with diverse portfolio of products and engineering services.

SPEL was founded to address the infrastructural crisis and knowledge gap in the Nigeria energy sector which is plagued by limited gas pipeline network, erratic supply of Piped Natural Gas resulting in high cost of fuels, frequent production downtime and huge spend in production cost.

Since 2019, SPEL has been supplying, installing gas equipment and providing related engineering solutions to bridge these challenges.

OUTLOOK -
The largest gas
equipment
supplier in Africa

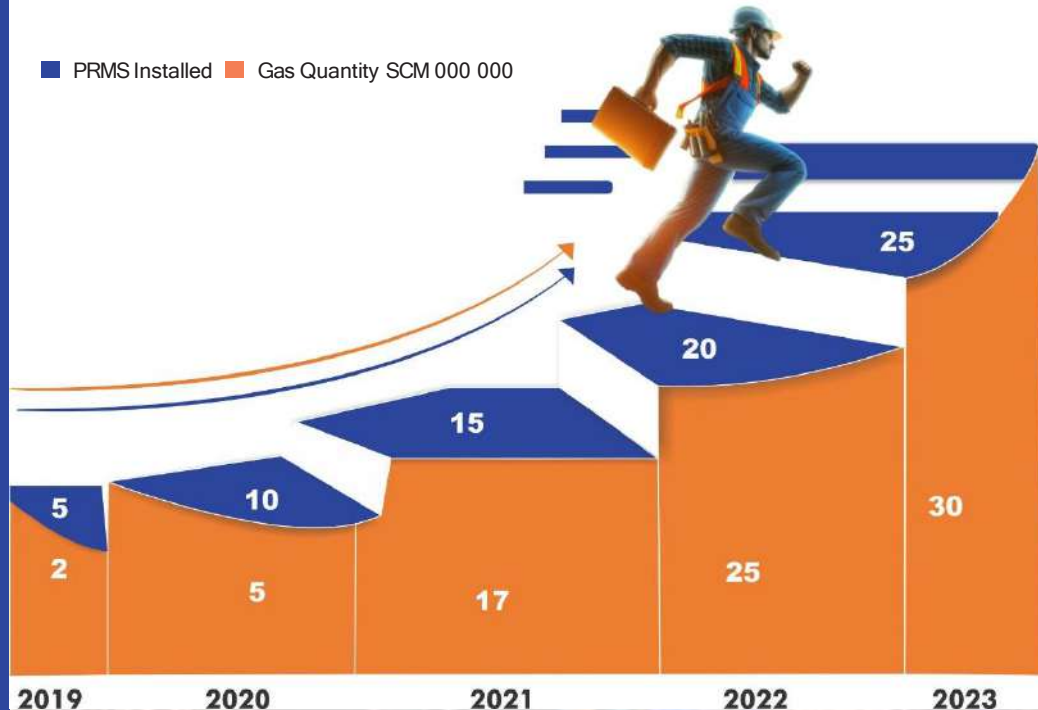

We are partners to China's
foremost gas equipment
manufacturer- **Tianjin Sinogas**
Repower Energy.

Progress since 2019

Soar Power and Energy operations are predominantly in Africa's Largest economy and gas producer, Nigeria. With installations across Nigeria, regulating more than 30,000,000 SCM gas monthly.

Supply and installation of Pressure Regulating and Metering Systems (PRMS), CNG tube skids for lease and natural gas infrastructural development for Small Medium Organisations, Commercial entities and Blue chip set-up.

Soar Power and Energy Solutions Limited (SPEL) has initiated programs that provide the rare opportunity for gas users to have access to information and equipment that eliminate contract barriers and improve the opportunity to have unlimited access to Natural Gas.

Pressure Regulating and Metering Unit (PRMS) Regulating gas pressure from 250 bar to 3-5 bar. Installation, Commissioning and maintenance of PRMS

Mobile Refueling Unit (MRU)

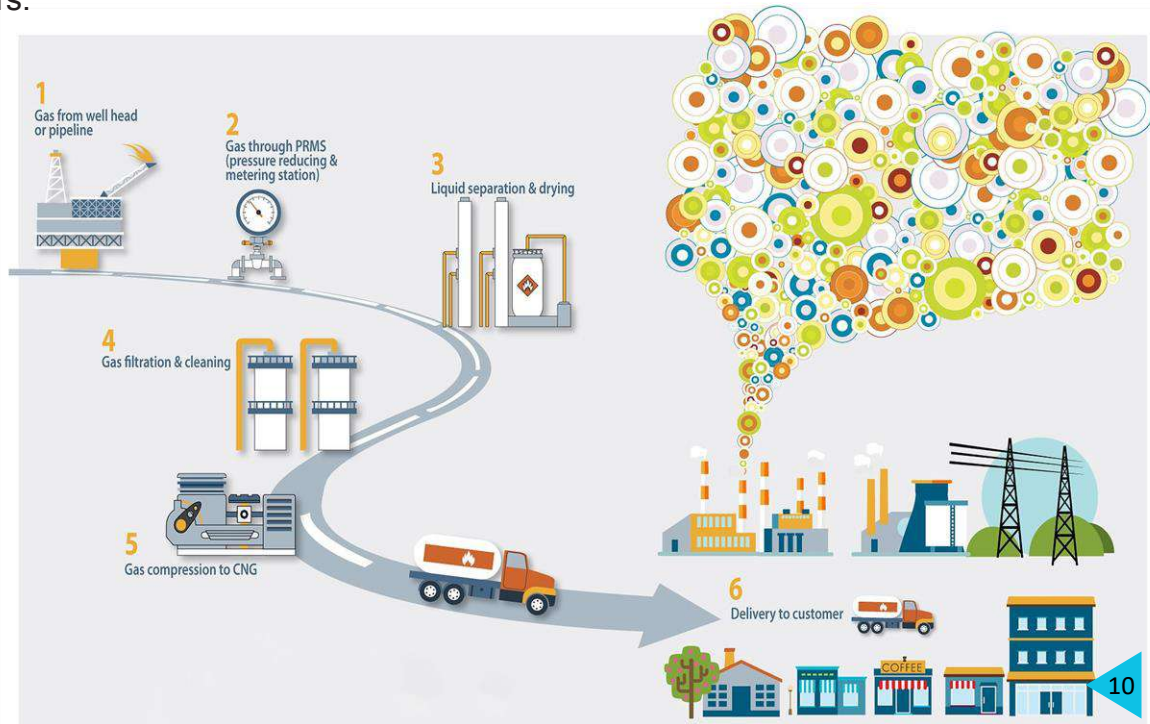

Pressure Regulating & Metering System

Virtual Gas Supply Chain

Natural gas is sourced from downstream producers with quality standards and processed to achieve high calorific value. The gas is compressed into specialized high pressure cylinders (250 Bar), which is trucked for onward delivery to customers.

At the customer facility, gas at high pressure is regulated to 5 bar or less with the support of a Pressure Regulating and Metering Unit which also displays gas consumption in real time.

Why invest in PRMS

Reduce gas tariff by 40 percent

Investment in PRMS and CNG skid rental reduces the price of Natural gas significantly.

Avoid Production downtime

Access to multiple gas suppliers

24 x 7 Availability of CNG Skids that translates to unhindered operations.

Gas supplier flexibility

Choose your gas supplier anytime.

High bargaining power

Reduce the risk of constant gas price increase

Accurate meter reading

Correct hourly, daily, and monthly consumption.

Quality equipment

Long lifecycle of every component including regulators.

We are the Chosen Brand

Geographical Presence

SPEL has more than 35 installations located in the South East and South West regions.

Effective aftersales support

24 hours response time to queries with all spares and kits in stock

In-house spares and repair kits

Spares and repair kits of PRMS, CNG Skids are available at our local office.

Access to industry intelligence

News and reports regarding oil and gas industry.

Free preventive Maintenance

Quarterly preventive maintenance for one year after installation.

Cost effective equipment

Affordable equipment with high output

Convenient Payment Plan

Break out payments

Skilled Workforce

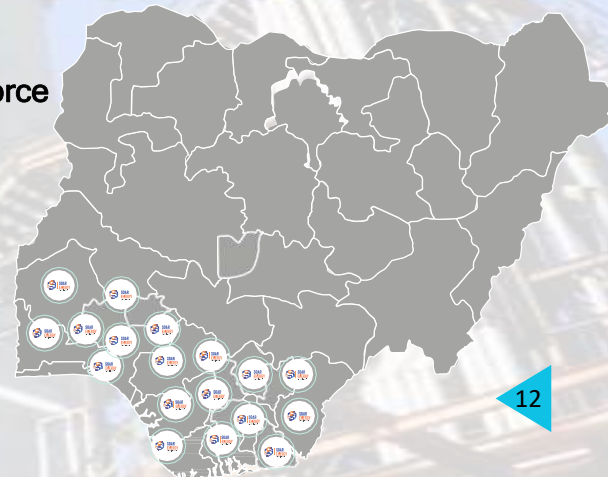

Double Stream

Our PRMS is double stream with one working regulator and another as standby.

Equipment Warranty

1 year warranty
